BLINDS &  
SHUTTERS

## WHY KIRI BLINDS & SHUTTERS

**KIRI HAS EXCELLENT DIMENSIONAL STABILITY MAKING IT THE IDEAL TIMBER FOR BLINDS AND SHUTTERS.**

### NATURAL BEAUTY

The colour uniformity of the grain is one of Kiri's most distinguishing features and makes it highly sought after material for products such as blinds and shutters. The light honey colour of the wood is complemented by a uniform, fine grained texture with a satin lustre and knot-free appearance.

### DIMENSIONAL STABILITY

Kiri timber has excellent dimensional stability because of the low wood density and low shrinkage factor. This property contributes to Kiri's suitability for use in blinds and shutters and a number of other uses where dimensional stability and water repellency is important.

### RESISTANCE TO DECAY

Kiri timber has high resistance to insect damage and rot. Research carried out by the Queensland Forestry Research Institute confirms that the timber is unattractive to termites.

### FINISHING

The lack of pitch of resinous extractives that are soluble in paint vehicles contributes to Kiri's good finishing properties. Kiri takes a variety of coatings, paints and stains exceptionally well, particularly when dried and properly primed.

### KIRI BLINDS

Kiri blinds allow for excellent airflow throughout your rooms. They are an attractive and practical window treatment that enhance the look and feel of your home or building. Blinds that are custom made from Kiri are durable, long lasting and resistant to weather and warping. Due to its superior performance characteristics, Kiri blinds can be produced thinner than other timber blinds offering greater visibility and neater appearance when retracted.

### KIRI SHUTTERS

Whether you seek a contemporary or classic look, Kiri shutters enrich any space. In addition to its use as window coverings, Kiri shutters work exceptionally well as room dividers or door panels due to the stability of the species. Kiri's low density wood is knot free and its grain is receptive to lacquer, varnish or stains. Kiri offers excellent colour retention when sealed (coated) and can be colour matched to any pastel colour.

ALMOST ANY SHAPE IS ACHIEVABLE SO YOU ARE FREE TO INCORPORATE THE MOST IMAGINATIVE DESIGNS.

SHUTTER STYLES INCLUDE:

- Traditional
- Plantation
- Aerofoil
- Bi-folds
- Lift out
- Hinge Panel
- Sling Panel Curved
